

Confined Space Rescue & Recovery of a Casualty

COURSE OUTLINE

This course provides attendees with the skills to work as part of a dedicated recovery team in a confined space environment.

Delegates will learn to rescue and recover casualties from a confined, enclosed or restricted space in the event of an emergency.

This course involves the use of respiratory protective equipment (RPE).

LEARNING OUTCOMES

It is envisaged that by the end of this course of training the learner will be able to answer questions on and perform the following:

- Use appropriate knowledge for carrying out emergency rescue and recovery of casualties from confined spaces
- Prepare to work safely in a confined space under emergency conditions
- Enter and exit a confined space safely
- Prepare and use respiratory protective equipment (RPE) in accordance with manufacturers specifications
- Use rescue equipment safely and in accordance with manufacturers instructions
- Follow procedures and work safely
- Deal with emergencies
- Recue planning
- Alternative strategies for effective rescue
- Tactical decision making
- Operational procedures
- Essential communications
- Emergency casualty evacuation
- Practical, scenario-based training

COURSE SPECIFICATION

- 2 Days.
- Theory and practical training and testing.

PRE-REQUISITE

A good standard of fitness is required to partake in the practical elements of this course and delegates will be required to complete a medical fitness questionnaire.
